## SUMMARY

Computer Science Engineering student with hands-on experience in Software Development using Java, Python, Spring Boot, Flask, MySQL, and Machine Learning. Built scalable backend applications, RESTful APIs, AI-powered systems, and full-stack web applications through academic projects. Strong foundation in Object-Oriented Programming, Data Structures, DBMS, SQL, and problem-solving. Passionate about building reliable, reusable, and scalable software while learning modern technologies and contributing to high-impact SaaS products.

## EDUCATION

|                                                                                                           |                                      |
|-----------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Alva's Institute of Engineering and Technology, Karnataka</b><br>B.E. Computer Science and Engineering | 2023 - Pursuing<br><b>CGPA: 8.85</b> |
| <b>Shree Gurudeva PU College, Belthangady</b><br>Pre-University Education                                 | 2021-2023<br><b>93.3%</b>            |
| <b>Government High School, Venoor</b><br>High School Education                                            | 2019-2021<br><b>90.8%</b>            |

## TECHNICAL SKILLS

|                    |                                                                                             |
|--------------------|---------------------------------------------------------------------------------------------|
| <b>Programming</b> | : Java, Python                                                                              |
| <b>Frontend</b>    | : HTML, CSS, JavaScript                                                                     |
| <b>Backend</b>     | : Spring Boot, Flask, REST APIs                                                             |
| <b>Database</b>    | : MySQL, SQLAlchemy                                                                         |
| <b>AI / ML</b>     | : Machine Learning, Scikit-learn, TensorFlow, Keras, OpenCV, MediaPipe                      |
| <b>Tools</b>       | : Git, GitHub, Maven, Postman, VS Code, Microsoft Excel                                     |
| <b>Concepts</b>    | : Object-Oriented Programming, Data Structures, Algorithms, DBMS, SQL, Software Development |

## PROJECTS

### AI-Based Depression Diagnosis Using EEG Brain Signals (Ongoing)

*Python, TensorFlow, Keras, CNN-LSTM, Scikit-learn*

- Developing an AI-driven software solution for depression detection using EEG signals.
- Designing a hybrid CNN-LSTM model with attention mechanisms for accurate classification.
- Performing data preprocessing, feature engineering, and model optimization.
- Applying Explainable AI techniques to improve model interpretability and decision support.

### Student Management System

*Java, Spring Boot, MySQL, Maven, REST API, Git, GitHub, Postman*

- Developed a scalable backend application using Java, Spring Boot, and MySQL.
- Built reusable RESTful APIs to perform CRUD operations on student records.
- Implemented DTOs, validation, and exception handling to improve software reliability.
- Tested APIs using Postman and managed version control with Git and GitHub.

### Human Activity Recognition Using Machine Learning

*Python, OpenCV, MediaPipe, Scikit-learn*

- Developed an AI-powered real-time activity recognition system using Machine Learning.
- Extracted human pose landmarks and generated feature vectors using MediaPipe Pose.
- Trained a Random Forest classifier to recognize Sitting, Standing, and Walking activities.
- Integrated OpenCV for live video processing and real-time prediction.

### Smart Job Recruitment Portal

*Python, Flask, MySQL, SQLAlchemy, HTML, CSS, JavaScript*

- Developed a full-stack recruitment portal with Candidate and Recruiter modules.
- Implemented secure authentication, session management, and role-based authorization using Flask.
- Built backend features for job posting, application management, and database operations using SQLAlchemy and MySQL.
- Designed responsive user interfaces and reusable components using HTML, CSS, JavaScript, and Jinja2 templates.

## **Price Snap – E-Commerce Price Comparison Website**

*HTML, CSS, JavaScript, PHP*

- Developed a responsive web application to compare product prices across multiple e-commerce platforms.
- Designed reusable frontend components for efficient product comparison.
- Improved user experience through interactive JavaScript functionality.
- Built a responsive interface compatible with desktop and mobile devices.

## **CERTIFICATIONS**

---

- Machine Learning Specialization,Java Fullstack ,Google cloud,Google AI– Coursera, 2026
- NLP and Deep Learning,Machine Learning and AI,GenAI – PrepInsta, 2026
- NPTEL Certification, 2025
- Infosys Springboard, 2024
- Python (Intermediate) – Scaler, 2023
